

****These questions are basic questions to get you started with your studying.****

Chapter 1 Practice problems

1. Which of the following statements about hypotheses is false?
 - a. A hypothesis requires research
 - b. A hypothesis is a testable prediction
 - c. A hypothesis must be able to be duplicated
 - d. A hypothesis is a proven fact
2. Which of the following examples meets the criteria of a scientific theory?
 - a. You concluding that a dead battery is what caused your car to fail to start
 - b. Many years of research supporting the Theory of Evolution
 - c. A scientist accepting her research hypothesis after duplicating her study several times
 - d. Your friend predicting that the Kansas City Chiefs will win the Super Bowl.
3. Hypotheses must have at least one predictive hypothesis and one null hypothesis. True/False
4. Which of the following is an example of a Null Hypothesis?
 - a. Rats in NYC are longer than rats in Orlando
 - b. Pigeons at Disney World are less aggressive than pigeons at Sea World
 - c. There is no difference in jumping height between dolphins in the Atlantic Ocean and dolphins in the Pacific Ocean
 - d. Pet snakes and wild snakes show differences in the number of mice consumed each year.
5. Which of the above examples is a generic Predictive Hypothesis?

6. What is the optimal water depth for producing bubbles?
 - a. 5 m
 - b. 10 m
 - c. 15 m
 - d. 20 m

7. At which depth did plants produce the least amount of bubbles?
 - a. 5 m
 - b. 15 m
 - c. 25 m
 - d. 35 m
8. List the taxonomic levels of organization from most inclusive to least inclusive
9. Which of the following taxonomic levels would include species that are the most closely related?
 - a. Phylum
 - b. Order
 - c. Genus
 - d. Domain

Answers:

1. D
2. B
3. True
4. C
5. D
6. B
7. D
8. Domain, Kingdom, Phylum, Class, Order, Family, Genus, Species
9. C
